-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3635

1. This Office action is in response to the amendment filed 03/21/05. Claims 1-10 are pending.
2. Claims 2, 7, and 8 are objected to because of the following informalities: in claim 2 "said ledge" lacks antecedent basis, in claims 7 and 8 "said construction element" lacks antecedent basis, in claim 7 "said fastening portion" lacks antecedent basis, and in claim 8 "said top and bottom walls" lack antecedent basis. Appropriate correction is required.
3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 6,324,796 to Heath in view of U.S. Patent 5,816,010 to Conn.

Heath provides each of the elements of the claims (see figures 2 and 4 and their descriptions) except for providing a ledge adjacent the upwardly extending wall of the upwardly open channel of the second side. The ledge being provided with a plurality of apertures for receiving fasteners therethrough for engagement with an underlying support structure.

Conn teaches that it was known at the time of the invention to provide a ledge 44 adjacent an upwardly extending wall 48 of a channel on the second side of a construction element. Where the channel is adapted to receive a downwardly

extending flange 14 of a first side in watertight relation and where the ledge 44 is provided with a plurality of apertures 54 for receiving fasteners 55.

It would have been obvious at the time of the invention to one having ordinary skill in the art at the time of the invention that the decking panels of Heath could have been provided with a ledge adjacent upstanding wall 19 as taught by Conn at 44 to provide an additional nailing flange for securing the decking panels to the substructure 27. The motivation for the modification is the teaching of the desirability of the ledge/flange 44 in the Conn reference.

5. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

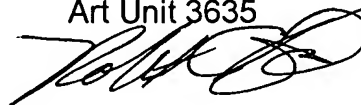

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J. Canfield whose telephone number is 571-272-6440. The examiner can normally be reached on M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Friedman can be reached on 571-272-6842. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
